Statement on General Product Safety Regulation (EU) 2023/988

Sappi Europe is mainly a producer of paper. Our products are typically not sold directly to end consumers, but further processed by other industry customers (B2B business). They are therefore not directly used by end consumers, and not intended to be used by end consumers. However, the definition of ‘product’ in Article 3 of the General Product Safety Regulation EU 2023/988 still might be applied also to our products, as their further processing may be interpreted as ‘interconnection’ with other products.

For this reason, this regulation might be directly applicable to our products.

We confirm the compliance of our products with Article 5 of EU 2023/988. Even though they do not constitute the final article ending up at the end consumer, they all constitute for themselves safe products.

The means on how to prove the safety of said products depend on the final application of the end product.

This information provided in this statement applies only for the above mentioned product and may not substitute necessary end use testing. Sappi shall not be liable for any damage or injury resulting from misuse or uninstructed use of its products. This statement shall not be regarded as a warranty of fitness for particular purpose or end use. The end users shall have responsibility for verifying the suitability of the product for a particular application or end use.

The information given in this statement has been verified by Sappi at the date of its publication and we shall not be liable for any future changes in information, contents, processes, regulatory or legal requirements included in this statement.
